- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
3. Claims 1 - 6, 8-12, 14 - 25, and 27 - 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Jay S. Walker et al. (Pat. # US 6,327,348 B1, – herein referred to as Walker).

As per claim 1,

Walker disclosed a method for processing transactions, comprising:

initiating a transaction to access an account (col. 2, lines 34-49);

sending an authorization request to an authorization entity associated with the account (col. 2, lines 61-67);

connection, a modem connection, a network connection, an email, and an Internet  
connection (col. 6, lines 1-5).

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7, 13 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jay S. Walker et al. (Pat. # US 6,327,348 B1, – herein referred to as Walker) in view of Greg E. Blonder et al. (Pat. # US 5,708,422 – herein referred to as Blonder)

As per claim 13,

Walker disclosed the method of claim 11, wherein generating the transaction itemization detail, further comprises generating at least one of an image of a receipt associated with the transaction, a text file including data related, to items purchased in the transaction (col. 8, lines 41-53); (col. 12, lines 7-26); (col. 6, lines 6-18).

However, Walker does not expressly disclose an image of a signature of an account user initiating the transaction.

In a similar field of endeavor, Blonder discloses an image of a signature of an account user initiating the transaction (Blonder; col. 11, lines 5-20).

In light of the teaching of Blonder, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the method of Walker wherein an image of a signature of an account user initiating the transaction would be provided as recited in claim 13.

Art Unit: 3694

This modification would provide a method to reduce the risk of financial loss by fraud, along with greater security and accountability.

As per claim 7,

Claim 7 is a method claim corresponding to method claim 13. Therefore, claim 7 is analyzed and rejected as previously discussed with respect to claim 13.

As per claim 26,

Claim 26 is a system claim corresponding to method claim 13. Therefore, claim 26 is analyzed and rejected as previously discussed with respect to claim 13.
